DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-16, drawn to a method of manufacturing a semiconductor device.

Group II, claim(s) 17, drawn to an apparatus for processing a substrate.

If a reference teaches these common elements, the requirement of unity of invention is not satisfied. Noda et al., US 2003/0077920, disclosing an apparatus for manufacturing a semiconductor device, teaches each common feature between the above claim groupings:

- A reaction furnace (11);
- Gas supply lines (12, 13) input to the furnace;
 - Wherein an inert gas is fed to the furnace ([0056]);
- A means to load and remove the substrate from the furnace ([0012]);
- A means for furnace evacuation ([0049]).

In light of Noda, the claims of the applicant are not technically significant under PCT Rule 13.2, Section 2. As such, the claims do not satisfy the requirement of unity of invention.
